

## Esri Deutschland: Management Buyout Paves the Way for the Future

**Esri Deutschland GmbH (formerly Esri Deutschland Group GmbH) has been completely taken over by the previous management team and Esri Inc. in the course of a management buyout.**

**Kranzberg (Germany), August 9, 2018**—On June 14, 2018, the previous managing directors Peter Jäger (Esri Schweiz AG), Jürgen Schomakers (Esri Deutschland GmbH) and Philipp Ullherr (Esri Deutschland Group GmbH) jointly with Jack Dangermond (President Esri Inc.) have acquired all shares of Esri Deutschland GmbH (formerly Esri Deutschland Group GmbH) from the previous shareholders by way of a Management Buyout (MBO), thus setting the course for the long-term and successful future development of the geographic information system (GIS) platform provider in Germany.

"With ArcGIS, our powerful mapping and spatial analytics software, we are ideally equipped for the future. In the context of current topics such as digitization, big data, artificial intelligence, and location intelligence the demand for geographic information is increasing," stated the new management. "We're focusing on our core business as a GIS specialist and the integration of geodata and geoservices into digital workflows. We are very confident that this strategy will help us to continuously achieve high benefits for our customers and partners. This is our commitment with more than 300 employees and 80+ partner companies."
